

IVI Foundation Subspecialist Training Programme In Reproductive Medicine

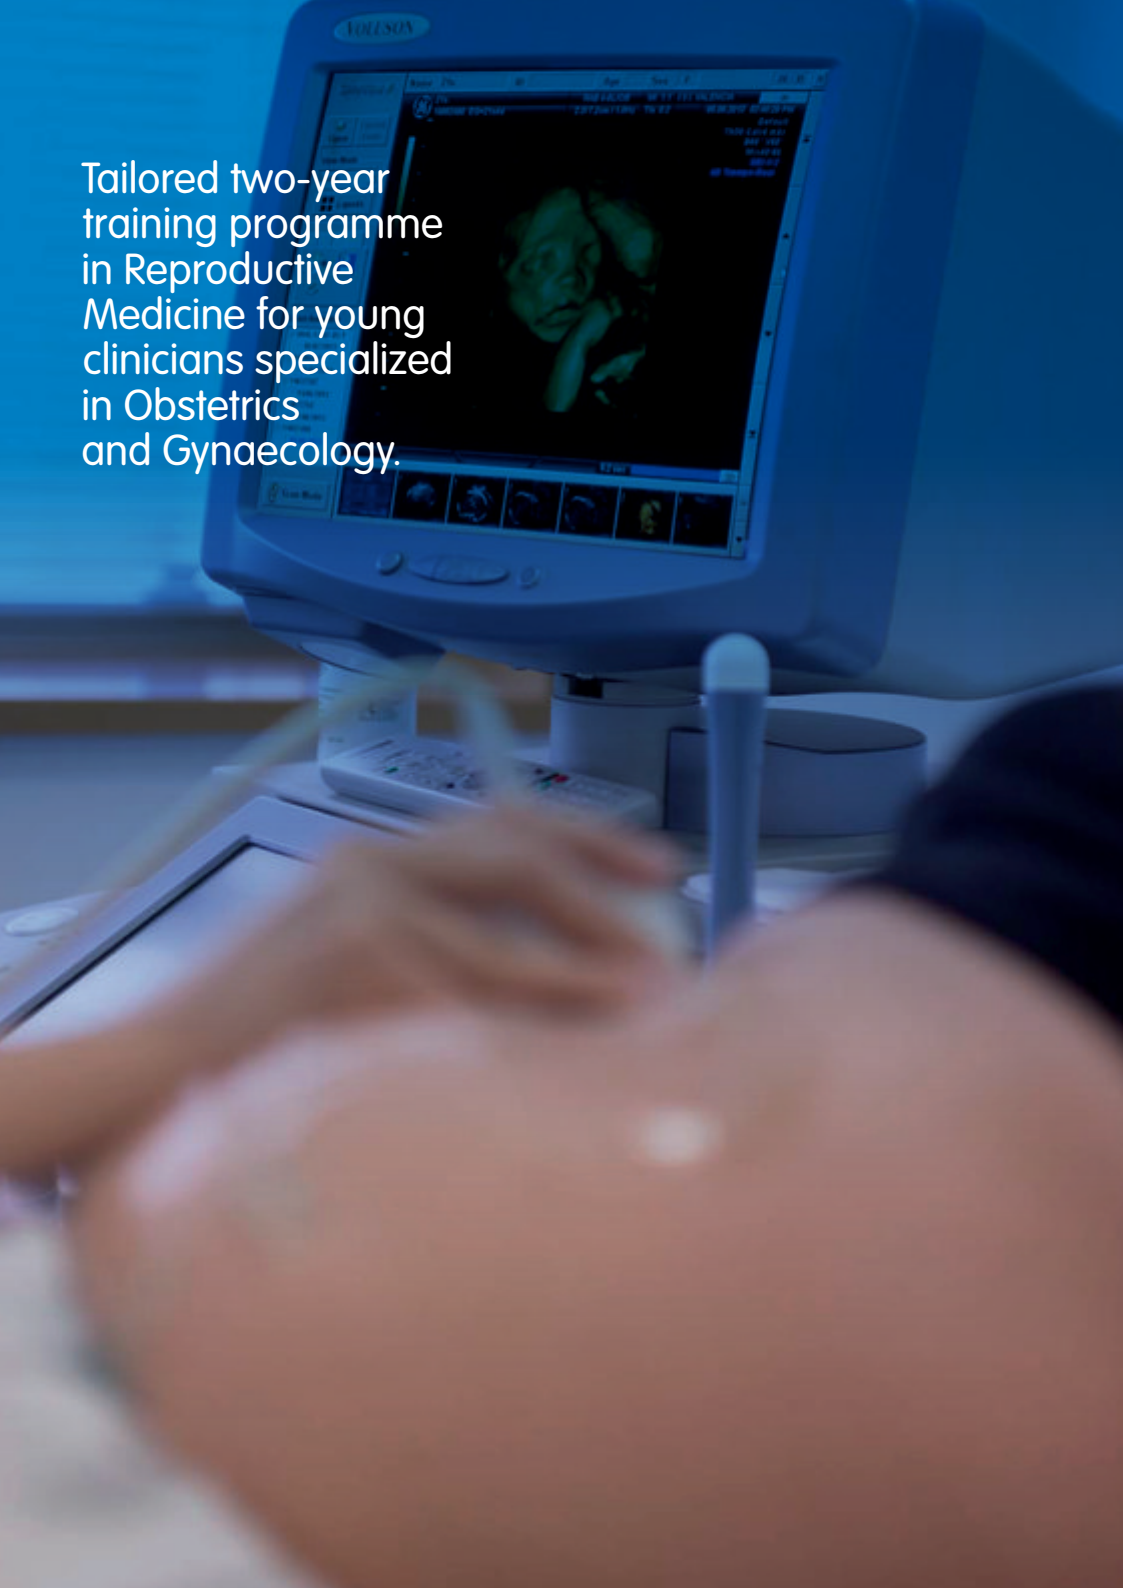

Edition IV

iviglobaleducation.com

Tailored two-year
training programme
in Reproductive
Medicine for young
clinicians specialized
in Obstetrics
and Gynaecology.

One of the fundamental pillars for IVI since its creation is its strong link to education and the firm purpose of transferring knowledge to the medical society.

At IVI we are committed to placing students at the center of our activity to offer them the best training and education in the field of Assisted Reproduction.

They will be immersed in an environment marked by the excellence of our educational standards, which are always up-to-date, innovative and based on cutting-edge technology.

Training fellows has been one key goal for IVI, giving young doctors the opportunity to join our clinics and learn by shadowing our well-known gynaecologists. During the two years of training, they will be exposed to all the procedures in the clinic, not just learning from top-class professionals, but also attending our day-to-day activity at the IVF and andrology laboratories.

Programme:

- Accreditation subject to satisfactory logbook completion of syllabus requirements and confirmation by assessors.
- Specific educational targets per training fellow.
- Formalised education timetable and assessment/feedback from tutors.
- Exposure to patient clinical management, reproductive surgery, IVF laboratory, endocrinology, andrology, psychology, genetics, pathology, early pregnancy, ultrasound imaging, statistics, research, legal aspects and hospital management.
- Attendance to workshops, patient management sessions and paper discussion roundtables at the clinic.
- Attendance to at least one ESHRE meeting within the 2 years.

Supported or accredited by the following institutions:

IVI Valencia and IVI Madrid are recognized as accredited **European Centers in Reproductive Medicine** by the **ESHRE** (European Society of Human Reproduction and Embryology) and **EBCOG** (European Board and College of Obstetrics and Gynaecology) for a two-year training programme of specialists in Human Reproduction.
