By choosing Global Education, you tap into over 30 years of experience and the expertise of our exceptionally qualified professionals.

Our dedication to research and innovation is what sets us apart, ensuring that you receive training from highly qualified and up-to-date experts on the latest advances in the field.

## Training & Consulting: Embryology Services

Embryology Services is a specialized offering that allows for the temporary assignment of an IVIRMA embryologist to work in another clinic or assisted reproduction center. This addresses specific needs such as a high workload, lack of qualified staff, or the opening of a new clinic.

The embryologist's responsibilities will include performing the following activities and training clinic staff in accordance with IVIRMA laboratory procedures and protocols:

- > Search for oocytes during follicular puncture
- > Carrying out the different assisted reproduction techniques
- > Evaluation of embryo quality
- > Evaluation of the results obtained together with the rest of the Laboratory to achieve optimal embryo development in the best possible conditions
- > Embryo cryopreservation
- > Monitoring the operation and quality of the IVF equipment to maximize its performance
- > Embryo biopsy
